- What are the total revenues that the club received during September? \$8,200
- What are the total expenses of the club during September? \$1,635
- Calculate the club's net income or loss during September. $\$ 8,200-1,635=\$ 6,565$ net income

## SOLUTIONS

## Learning Goal 11, continued

LG 11-5.

| Item | Step 1: Are assets affected? | Step 2: Are liabilities affected? | Step 3: Is owner's equity affected? | Correct Recording in Equation |
| :---: | :---: | :---: | :---: | :---: |
| a. | The asset equipment increases $\$ 8,000$ and the asset Cash decreases $\$ 2,000$. | A liability increase of $\$ 6,000$ occurs. | No | $\begin{aligned} & \uparrow \mathrm{A}=\uparrow \mathrm{L}+\mathrm{OE} \\ & 6,000 \\ & 6,000 \end{aligned}$ |
|  | The recording was incorrect because the equation was not in balance and because assets should have shown a net increase of $\$ 6,000$. This was the equipment increase of $\$ 8,000$ less the cash decrease of $\$ 2,000$. |  |  |  |
| b. | Cash increases by $\$ 900$ and accounts receivable decrease by $\$ 900$. | No | No | $\begin{aligned} & \uparrow \underset{9}{\downarrow} \mathrm{~A}=\mathrm{L}+\mathrm{OE} \\ & 900 \end{aligned}$ |
|  | The recording was incorrect because the revenue was already earned in a previous period when the account receivable was recorded. Here, the receivable is simply eliminated when the cash is received. |  |  |  |
| c. | Office Supplies increase by $\$ 2,000$ and cash decreases by $\$ 2,000$. | No | No | $\begin{array}{rl} \uparrow & \downarrow \mathrm{A}=\mathrm{L}+\mathrm{OE} \\ 2,000 & 2,000 \end{array}$ |
|  | The recording was incorrect because there is no expense-one asset (Cash) is being given up to obtain another asset (Office Supplies). An expense would have occurred only if there had been a net decrease in assets because they were used up in the operations. |  |  |  |
| d. | Cash decreases by $\$ 750$. | Accounts Payable decrease by $\$ 750$. | No | $\begin{aligned} & \downarrow \mathrm{A}=\underset{750}{\downarrow \mathrm{~L}}+\mathrm{OE} \\ & 750 \end{aligned}$ |
|  | The recording was incorrect because there is no expense. Paying a debt is a reduction in a creditor's claim on assets; the cash is not being used in operations, so there is no expense. |  |  |  |
| e. | No | Accounts Payable increase. | Owner's equity decreases because of telephone expense. | $\begin{aligned} & A=\uparrow L+\downarrow O E \\ & 200 \quad 200 \text { (expense) } \end{aligned}$ |
|  | Not recording the event was incorrect because an expense happens the moment a resource is consumed. In this case, when the telephone service was used the expense occurred and should have been recorded along with a liability, because the company did not immediately pay for the service. |  |  |  |
| f. | Cash increases. | Unearned Revenue increases. | No | $\begin{aligned} & \uparrow \mathrm{A}=\uparrow \mathrm{L}+\mathrm{OE} \\ & 500=500 \end{aligned}$ |
|  | The recording was incorrect because there is no revenue-the services have not been provided yet. An advance payment from a customer creates a liability to either return the money or perform the services. |  |  |  |
