## SOLUTIONS Learning Goal 15

## Multiple Choice

1. a
2. b
3. d
4. c
5. a
6. d Because all the correct accounts and amounts are entered, the account balances are correct.

The entries were simply recorded in a journal that is not supposed to be used for the original entry. This will result in the some entry type being "scattered" between two journals, but that is all.
7. c
8. d If a transaction involves any payment of cash, the entire transaction is recorded in the cash payments journal.
9. d Because "a" is a common beginner's mistake, "b" would not be correct for cash purchases, and " $c$ " would not be correct for cash sales.
10. c
11. c Recording a sale at the wrong amount will not cause the books to be out of balance in any way, but it will usually be noticed by the customer when the bill is received.
12. b Because the total debit posted to the controlling account will be $\$ 450$ greater than the total of the accounts in the subsidiary ledger. In this situation, we cannot rely on a customer to notify us when the statement shows an amount that is too low.
13. b In a manual system, transaction data used for journal entries are recorded directly into the special journals. In computerized systems, transaction data are entered into data entry screens instead of special journals. In both systems, special journals are used as transaction type summary reports.
14. d
15. a The only journal that both systems enter data directly into is the general journal. Whenever a general journal is used, knowledge of debits and credits is needed for that journal. Computerized systems use data entry screens (or scanners) for most transactions, and these screens do not require knowledge of debits and credits.
16. b The account is credited for the full amount even though less cash is received.
17. c
18. d However, if (c) is not adequately maintained, losses from theft and fraud could be extremely expensive.

## Reinforcement Problems

LG 15-1.

| Transaction | Journal |
| :--- | :---: |
| 1. Owner invested $\$ 5,000$ in her business. | CR |
| 2. Sold $\$ 1,000$ of merchandise on account. | S |
| 3. Sold $\$ 300$ of excess office supplies on account. | J |
| 4. Paid $\$ 2,000$ cash to pay accounts payable. | CP |
| 5. Bought $\$ 3,000$ of merchandise on account. | P |
| 6. Made a $\$ 500$ cash sale of merchandise. | CR |
| 7. Customer returned $\$ 100$ of defective merchandise. | CP |
| 8. Purchased computer for $\$ 4,000$; paid $\$ 500$ cash and signed a note payable for the balance. | CR |
| 9. Sold the company van; received $\$ 7,000$ cash and a $\$ 7,000$ note receivable for the balance. | P |
| 10. Bought $\$ 5,000$ of merchandise, terms $2 / 10, \mathrm{n} / 30$. | P |
| 11. Bought $\$ 250$ of office supplies on account. | S |
| 12. Sold $\$ 275$ of merchandise, terms $2 / 10, \mathrm{n} / 30$. | J |
| 13. Returned the merchandise purchased in transaction $\# 12$, above. | CP |
| 14. A business paid $\$ 4,000$ in dividends | CR |
| 15. Received $\$ 650$ payment from customer for amount owing from previous month's sale. | CP |
| 16. Bought $\$ 100$ of supplies for cash. | J |
| 17. Made adj usting and closing entries. |  |

## Comments:

1. To determine if a discount should apply, be sure to identify the date of the sale to see if the payment is received within the number of days allowed.
2. Also remember to enter the posting references for the "other" accounts and for subsidiary accounts.

## Comments:

1. To determine if a discount should apply, be sure to identify the date of the purchase to see if the payment is made within the number of days allowed. In the case of an "eom" (end of month) discount, verify that the payment was made within the designated number of days from the end of the month. (In this problem, Annapolis Company allowed a 1\% discount for payment made within 5 days from end of the month of sale.)
2. The November 5 credit to Accounts Payable is determined by calculating: $\$ 495 / .99=\$ 500$. Because you know the payment is within the discount period, the $\$ 495$ paid must be $99 \%$ of the total payable.
3. This problem accrues an expense (Nov. 29) as a reminder that a purchases journal can also be used to record accrued expenses (unpaid services). However, many companies prefer to keep all accruals on the general journal, especially if reversing entries procedures are used (see disk).
4. Also remember to enter the posting references for the "other" accounts and for subsidiary accounts.

LG 15-10.
a. Total sales: $\$ 27,650$ credit sales $+\$ 2,480$ cash sales $=\$ 30,130$. The three biggest customers this month: Scott Company, $\$ 7,000$ at $23.2 \%$ of total sales; Nguyen Company, $\$ 5,500$ at $18.3 \%$ of total sales; Anwen Enterprises, \$5,250 at $17.4 \%$ of total sales.
b.

| Sale Type | Total Sales | Cost of <br> Goods Sold | Gross Profit | Gross Profit <br> Percentage |
| :--- | ---: | ---: | ---: | ---: |
| Credit sales | $\$ 27,650$ | $\$ 11,240$ | $\$ 16,410$ | $59.3 \%$ |
| Cash sales | 2,480 | 1,275 | 1,205 | $48.6 \%$ |

There is clearly a difference between the gross profit percent of cash and credit sales. This should be investigated to determine if there is a business reason, and the effect on total sales.
c. Compare the November sales dates on the sales journal to the cash receipt dates on the cash receipts journal. By doing this, we see a sale made to Cabot Company on November 12. We received payment from Cabot Company on November 30, net of an $\$ 86$ dollar discount. Payment was received 8 days after the discount payment date.
d. To determine the unpaid November purchases, we compare the purchases journal and Accounts Payable payments made on the cash payments journal. The remaining unpaid November purchases are Office Suppliers for $\$ 5,500$; Computer Supply Company for $\$ 9,750$; Greenspan Company for $\$ 4,360$; and Canyon Wholesale for $\$ 1,500$. No discount is offered by Office Suppliers. For a discount, Computer Supply Company is due on December 3. Greenspan Company is due on December 2. Canyon Wholesale is due on December 7.
Note: If we had a subsidiary ledger, it would be much easier to simply review each accounts payable subsidiary account to determine the balance due, the credit terms, and the payment due dates for each outstanding payable.
e. Total November inventory purchases are $\$ 19,410+\$ 1,340=\$ 20,750$. The three biggest inventory suppliers are Greenspan Company at \$8,010 (38.6\%), Ontario Enterprises at \$5,100 ( $24.6 \%$ ), and Bernanke Company at $\$ 4,800$ (23.1\%).
f. The top three sources of cash receipts for November were collections from accounts receivable of $\$ 18,523$, a loan of $\$ 15,000$, and an owner investment of $\$ 12,000$. The loan and investment are not likely to recur in December.
g. Discounts do appear to be important to our customers. Of the five different cash receipts from credit customers in November, four of them took discounts (although Cabot Company paid after the discount period). The actual effective discount percentage taken was $\$ 327 / \$ 18,850=1.74 \%$ (see cash receipts journal).
h. Total discounts taken on November purchases can be calculated by looking at the cash payments journal and calculating discounts taken as a percentage of the accounts payable that are paid.

| Creditor Paid | \$ Amount of <br> Payable | Discount <br> taken | \% Discount <br> taken |
| :--- | :---: | :---: | :---: |
| Roosevelt Corporation | $\$ 1,200$ | 36 |  |
| Ontario Enterprises | 5,100 | $-0-$ |  |
| Greenspan Company | 3,650 | 73 |  |
| Bernanke Company | 4,800 | 50 |  |
| Washington Company | 800 | $-0-$ |  |
| Total | $\$ 15,550$ | $\$ 159$ | $1 \%$ |

The overall discount percentage is $\$ 159 / \$ 15,550=1 \%$. Clearly, something is wrong because we can see on the purchases journal that most terms are $2 \%$. To investigate this further, we should compare each purchase and each payment over a period of time.

## SOLUTIONS

## Learning Goal 15, continued

LG 15-10, continued
i. Total November cash receipts are $\$ 52,627$. The cash receipts that are probably non-recurring are the loan of $\$ 15,000$, the owner's investment of $\$ 12,000$, and the sale of equipment that provided $\$ 4,500$ cash. We can make a rough estimate of the "recurring" cash receipts as $\$ 52,627-(\$ 15,000$ minio $+\$ 12,000+\$ 4,500)=\$ 21,127$. Total November cash payments are $\$ 30,481$. The cash payment that is probably non-recurring is the purchase of land that required a cash payment of $\$ 7,000$. We can make a rough estimate of the "recurring" cash payments as $\$ 30,481-\$ 7,000=\$ 23,481$. It appears that November total recurring cash receipts of $\$ 21,127$ are less than total recurring cash payments of $\$ 23,481$. This means that we should be very cautious about the December cash inflows and outflows.

## SOLUTIONS

## Learning Goal 15, continued

## LG 15-11, continued

## Comments:

1. The total of final balances in Accounts Receivable subsidiary accounts should equal the controlling account balance: $\$ 10,580$.
2. The total of final balances in Accounts Payable subsidiary accounts should equal the controlling account balance: \$9,470.
3. The January 9 "for the balance due" payment from New Brunswick Company is within the discount period. The balance due is $\$ 1,500$; however, this is reduced by a $2 \%$ discount. This applies to all other customers paying within the discount period.
4. Even though New Brunswick Company made only a partial (short) payment on January 21 of the balance due, the payment was made within the discount period. Therefore, the payment is considered to be net of the $2 \%$ discount. So the amount of the Accounts Receivable to credit is $\$ 2,450 / .98=\$ 2,500$.
5. All checks are written in sequence, so the check number for the January 12 payment is \#303.
6. In the ledger accounts, individual items are posted daily and are recorded in the ledger as of the date of the transaction. Journal column totals are posted at the end of the month (January 31), so there is no particular order in which they are recorded into a ledger account. (They all have the same date: January 31.)
7. There is a double posting reference in the general journal for accounts receivable and accounts payable. (Posting to both controlling and subsidiary accounts.)

## LG 15-11, continued

## Comments:

1. The total of final balances in Accounts Receivable subsidiary accounts should equal the controlling account balance: $\$ 10,580$.
2. The total of final balances in Accounts Payable subsidiary accounts should equal the controlling account balance: \$9,470.
3. The January 9 "for the balance due" payment from New Brunswick Company is within the discount period. The balance due is $\$ 1,500$; however, this is reduced by a $2 \%$ discount. This applies to all other customers paying within the discount period.
4. Even though New Brunswick Company made only a partial (short) payment on January 21 of the balance due, the payment was made within the discount period. Therefore, the payment is considered to be net of the $2 \%$ discount. So the amount of the Accounts Receivable to credit is $\$ 2,450 / .98=\$ 2,500$.
5. All checks are written in sequence, so the check number for the January 12 payment is \#303.
6. In the ledger accounts, individual items are posted daily and are recorded in the ledger as of the date of the transaction. Journal column totals are posted at the end of the month (January 31), so there is no particular order in which they are recorded into a ledger account. (They all have the same date: January 31.)
7. There is a double posting reference in the general journal for accounts receivable and accounts payable. (Posting to both controlling and subsidiary accounts.)
8. Except for the casualty loss, the Merchandise Inventory account has no activity and the Cost of Goods Sold account is not used because with the periodic method, the inventory balance is not updated until the end of the period when the inventory is counted and cost of goods sold for the period is calculated.
